

Alexis Gabriel Gomez

JR. Fullstack Developer

About me

- I am working as a freelancer, and I have studied as a Full Stack developer. However, I find that I work better in Front End development in professional settings. I am trained in the MERN stack, but I have also self-taught Python, SQL, and Git. Currently, I am expanding my knowledge in the DevOps area

Education || Formation

- React native course in Coderhouse
February 2022 - May 2022
- Fullstack developer MERN in Nucba
April 2021 - July 2022
- High School in Eccleston
March 2012 - December 2017

Work experience

Car seller - Chevrolet dealership
March 2018 - September 2018

Developer, Web designer, Seo | Freelance
September 2021 - Now

- I started helping as a tutor to students to take programming exams. I also worked with Wordpress making different web pages for different clients as well as applying UX-UI design. Also another work to highlight that I did was a prototype in figma for a client from Paraguay who wanted to make a mobile app that includes cryptos with local teams. And lately I am working for a company applying SEO-CRM Marketing
